

## **Parameter Definitions - Simple Comparison Chart**

### **1. Privacy - Jurisdiction**

Where the company is located and is it a country that is known to spy on its citizens.

### **2. Privacy - Logging**

To what extent the service keeps activity and connection logs and the clarity of their logging policy.

### **3. Privacy - Activism**

To what extent the company supports privacy by helping users pay anonymously and providing tools to help activists.

### **4. Technical - Service Configuration**

How well the company's protocols are known to protect against known threats.

### **5. Technical - Security**

How well the company's encryption security is documented and is likely able to withstand known threats.

### **6. Technical - Availability**

Number of user devices allowed, number of servers to connect to, number of countries with available servers.

### **7. Business - Website**

How secure the company's website is and how much it respects user privacy.

### **8. Business - Pricing**

The cost of the service per connection, and if they have trial periods, refunds.

### **9. Business - Ethics**

How transparent a company's policies are, what they expect of their partners and if they enforce the rules with them.

**Using a three color grading system, each parameter is assigned a value:**

**Red** - there are major shortcomings and/or issues causing major concern

**Yellow** - there are some shortcomings and/or issues causing some concern

**Green** - there are minimal or no shortcomings and/or concerns
